

Gravity Bin Feeder

DESCRIPTION	MATERIAL NO.	UPC
Gravity Bin Feeder	100079410	045125619218

The **Kaytee® Gravity Bin Feeder** is the most efficient and convenient means of supplying up to 5 days worth of pellets, grains or seed mix diets to Rabbits, Guinea Pigs, Ferrets or Chinchillas.

DESIGN

Injection molded from the highest quality chew resistant polymer, it will provide years of quality service, which no other feeder can. It has no sharp edges which could cause harm. It will not rust, it is very hygienic and easy to clean.

SNAP-LOCK BRACKET

The patented self locking snap-lock bracket was designed to securely hold the feeder in its desired location even with the most energetic pets. It can be mounted inside or outside any wire cage or can be adapted to glass, laminate or plastic walled surfaces.

SIFTER FLOOR

The Perforated 'Sifter Floor' prevents pets from inhaling pellet dust (fines) while eating. This eliminates many common respiratory problems. The design also allows the 'fines' to fall through the feeder floor and into the cage bottom, not outside the cage.

ADDITIONAL CONVENIENT FEATURES

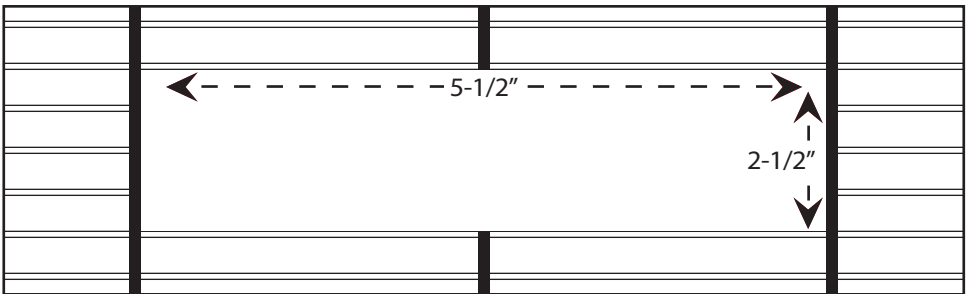

The snug fit contour lid offers minimum resistance when opening and yet locks upright while re-filling. In addition, the exclusive built in back leg allows the feeder to stand on its own for easy 'no mess' refilling and cleaning.

MOUNTING INSTRUCTIONS ON REVERSE SIDE →

FOR OUTSIDE MOUNTING (Wire Cages)

CAUTION: Before cutting the wires make sure your desired location is correct. When cutting the wire, cut out a smaller opening first; then measure and line up the feeder. Cut again if necessary. **IMPORTANT:** Wear protective eye & hand gear during cutting procedures.

- 1) First attach bracket to the front of the feeder and align the feeder to the desired location. This location (not a corner) should be at the lowest point which will allow your pet to reach the feeder properly. If possible a left or right side, in the center is best. Make sure the bracket can be mounted properly above the proposed opening.
- 2) In the desired location, carefully cut out an opening as close to (but at least) 5 1/2" wide by 2 1/2" high.

- 3) First attach bracket to the front of the feeder and align the feeder to the desired location. This location (not a corner) should be at the lowest point which will allow your pet to reach the feeder properly. If possible a left or right side, in the center is best. Make sure the bracket can be mounted properly above the proposed opening.

FOR INSIDE MOUNTING (Wire Cages)

Attach the bracket onto the back of the feeder. Line up the feeder in the desired location (not a corner) low enough for proper reach. Remove the bracket and attach it between the wires while tightening the metal fastener. Snap the feeder into the bracket and it is now ready to use.

Our Customer Service Department is available to help with any problems. Our Toll-Free Number (within the USA and Canada only) is 800-255-4527, Monday - Friday from 8:00 a.m. to 4:00 p.m. (Central Standard Time).
