

Flat-Bac Water Bottle

- Snap-lock bracket makes filling fast and easy
 - Spring-loaded dripless sipper
- Floating Duck - "The Friendly Refill Reminder"
 - Convenient E-Z twist attachment knob
- Adapts for inside cage or outside cage mount

Premium Quality Water Bottle

The contour Flat-Bac water bottle has a smooth, flat surface that fits tightly against the pet cage thanks to the snap-lock bottle bracket with the convenient E-Z twist attachment knob. Attach the bracket through the cross wires and turn the E-Z twist knob clockwise until the bracket is secured to your pet's home.

1. Fill the Flat-Bac Water Bottle completely
2. Screw cap on tightly
3. Position sipper tube so it faces straight out from flat side of bottle
4. Turn bottle upside down to allow a vacuum to form
5. Position bottle at a comfortable level for your pet and snap into place

An optional Suction Cup Kit (Item #100079416, sold separately) can be added for mounting to a glass, plastic or laminated surface.

Maintenance Tips:

- Wash and rinse bottle and sipper with each refill
- Keep sipper tube free of foreign materials
- Make sure Snap-Lock Bracket fits securely
- Use room temperature water only

Note:

Temperature fluctuations or excessive cage vibration sometimes cause occasional dripping. Whenever you move your pet's home, always remove the water bottle.

Special Care Tip:

If you have a young pet, place a small dish of water under the sipper until it learns to use the sipper tube regularly.
