

Removing the Turn-About Wheel for Instant Fitness Fun

Unscrew the Turn-About Securing Stand Screw (**I**) and lift the assembled Turn-About Wheel from the cage. Remove the Bubble Plug (**U**) from the Crittertrail® Turn-About Habitat. Attach the extra Connector Ring (**Q**) to the Bubble Plug (**U**). Snap the Connector Ring (**Q**) & Bubble Plug (**U**) onto the opening of the Turn-About Wheel.

NOTE: Never use in direct sunlight, on a table, or near stairways. Several periods of 15-30 minutes each day will keep your pet happy and healthy.

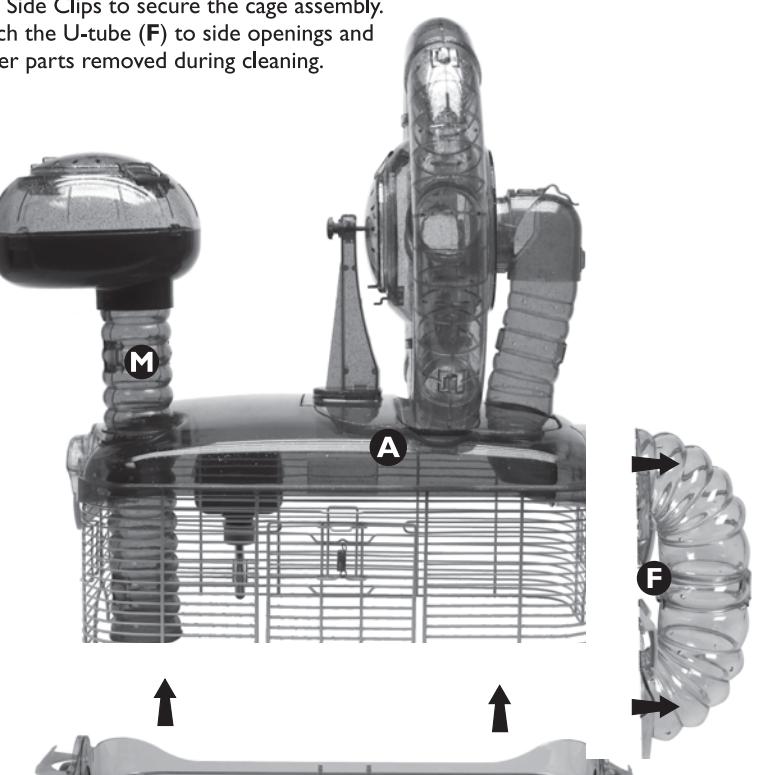

SPECIAL NOTE: DO NOT remove the Turn-About Wheel if you have more than one pet inside your Crittertrail® Turn-About Habitat. Removing the Turn-About Wheel leaves openings in your Crittertrail® Turn-About Habitat and other pets left inside the cage may escape!

Cleaning Your CritterTrail® Turn-About Habitat

Remove the U-Tube (**F**) and set aside. Push the bottom Side Latches (**E**) down and lift the entire upper assembly off the Scatter-less Base (**A**). Set the assembly on a flat surface while you empty the Scatter-less Base (**A**). For better results, remove the 10" Fun-nel® Tube (**M**) with Elbow (**P**).

Empty and wash the Scatter-less Base (**A**) with soap and water or spray with Super Pet® Clean Cage (Item #100079553), and wipe dry. Super Pet® Clean Cage neutralizes odors, safely cleans surfaces, and is non-toxic to all pets.

After cleaning, replace the soiled bedding. Place the upper cage portion back onto the Scatter-less Base (**A**). Line up the grooves and gently press down. Press up on the Bottom Side Clips to secure the cage assembly.

STEP 1 Fill Scatter-less Base with Bedding

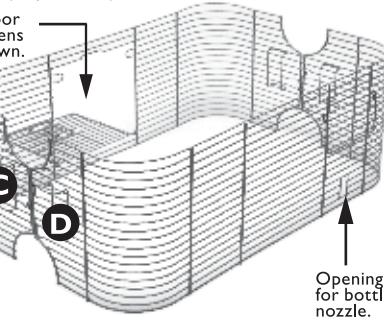

Fill the Scatter-less Base (A) with a liberal amount of bedding material. (Not Included)

STEP 2 Connect the Wire Panels

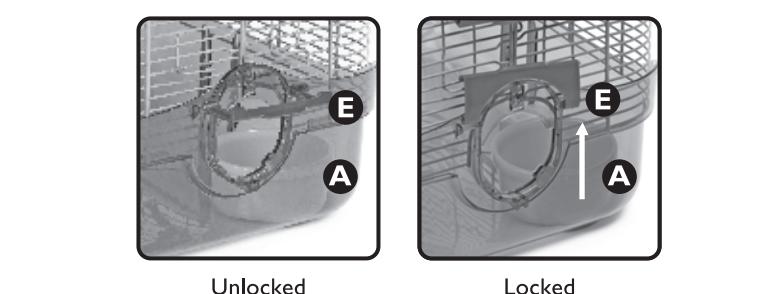

Place the Front Wire Panel w/ Door (C) so the spring loaded door latch opens downward. Place the Back Wire Panel (D) so that the opening for the bottle nozzle is on the bottom. Connect the Front Wire Panel w/ Door (C) to the Back Wire Panel (D) by hooking the wire into each other (as pictured).

STEP 3 Attach Wire Panels

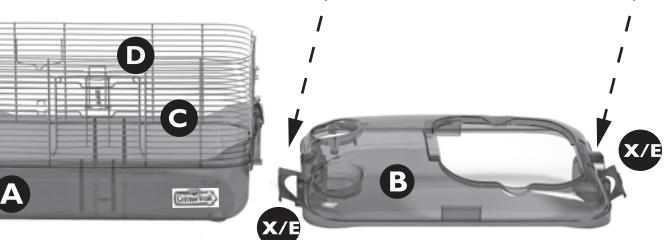

Place the assembled Front Wire Panel w/ Door (C) and the assembled Back Wire Panel (D) onto the Scatter-less Base (A). The Wire Panel Assembly should fit inside the tabs of the Scatter-less Base (A). To secure, snap the two Side Latches (E) on the Scatter-less Base (A) to the Wire Panel Assembly (C & D).

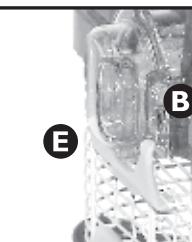

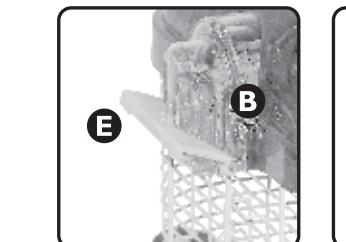

STEP 4 Roof Top Attachment

First, attach a Roof Top Passageway (X) with Latch Assembly (E) to the left and right side of the Roof Top. Press firmly, the Assembly snaps tightly into Roof Top.

Place the Roof Top (B) onto the top of the assembled bottom portion of the habitat. Line up the Roof Top (B) over the assembled Wire Panel Assembly (C & D). To secure, connect the two Side Latches (E) on the Roof Top (B) to the Wire Panel Assembly (C & D).

STEP 5 Look-Out Room Assembly

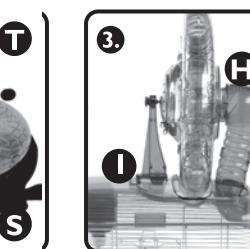

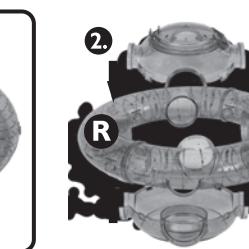

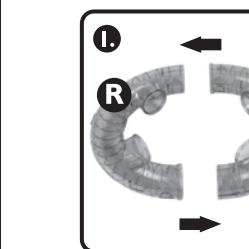

Unlocked

Locked

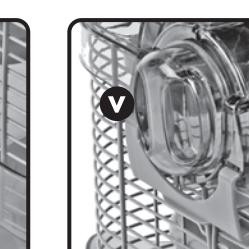

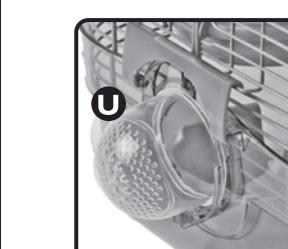

STEP 6 Turn-Around Wheel Assembly and Attachment

Connect the Turn-Around Wheel halves (R) as pictured in image 1.) Next, place the assembled Turn-Around Wheel Halves on top of the Turn-Around Center w/ Petting Zone™ (T) on top of the connected Turn-Around Wheel Halves (R) and push firmly until the Turn-Around Centers (S & T) "click-lock" together, as pictured in image 2.) Finally, attach the assembled Turn-Around Wheel to the Turn-Around Securing Stand w/ Screw (I) and the Turn-Around Attachment Hub (H). Secure the Turn-Around Wheel by tightening the screw on the Turn-Around Securing Stand (I), as pictured in image 3.) Slide lever on Attachment Hub (H) forward.

STEP 7 Accessory Attachment

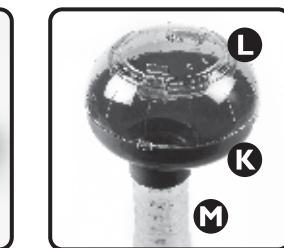

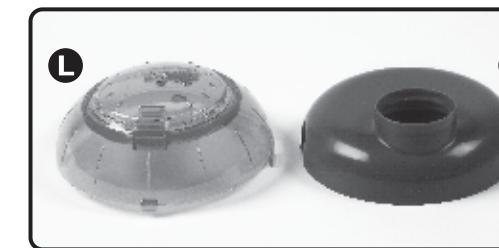

Lock the Bubble Plug (U) into the bottom circular opening of the left side. Slide the Twist Lock Opening Cap (V) downward into the u-shaped lip on the top, left side passageway. To lock, turn so the gap faces downward. To unlock, turn the gap so it faces upward and slide up. Next, slide the U-Tube (F) onto the circular opening of the right side. The U-Tube (F) will allow your pet to have access to the Exercise Wheel.

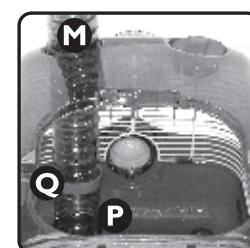

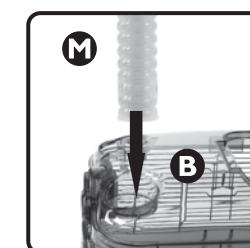

STEP 8 Look-Out Room Assembly

Line up the tabs on the Look-Out Lid (L) with the slots on the Look-Out Base (K). Press together until they snap into place. The 10" Fun-nel® Tube (M) is divided by 3 support rings, located almost center on the Fun-nel™ Tube. Attach shorter end (divided by the support rings) of the 10" Fun-nel® Tube (M) to the bottom of the Look-Out room.

NOTE: Be sure to lock the top lid closed until it clicks shut to keep your pet secure.

Place the assembled Look-Out and 10" Fun-nel® Tube into the front, left side opening hole in the Roof Top (B). Attach the Connector Ring (Q) to the Elbow (P). Insert the assembled Elbow with Ring (P & Q) through the front door opening and attach to the 10" Fun-nel® Tube (M). Place the Locking Cap (W) inside the open Roof Top (B) hole in the back of the Habitat.

STEP 9 Using the Water Bottle and Food Dish

To fill Water Bottle (N), remove the twist off cap with rubber stopper. Fill bottle completely by placing it under a light stream of running water. Close the bottle by pushing in the rubber stopper and twisting the cap. Turn the bottle upright and allow the vacuum to form. You may experience a few initial drips. Locate the attached wire bottle holder and bottle sipper tube hole location on the Back Wire Panel (D). Place the sipper tube into the hole and pull the wire bottle holder in place. When refilling your Water Bottle, **never squeeze it.** This may cause a fracture in the plastic and make it impossible for the necessary vacuum to form.

Note: Temperature fluctuations and excessive cage vibrations sometimes cause occasional dripping. Whenever you move your CritterTrail® Turn-Around Habitat always remove the Water Bottle.

Place a quality food mixture (Not Included) into your pet's tip Round Food Dish (O). Dish can be placed in any corner of your new CritterTrail® habitat. Do not place Round Food Dish (O) under the Water Bottle (N).
