

# Tap Fill Water Bottle

## Easy to Fill Design:

1. Easy to open, quick fill flip top cap
2. Adjustable locking bracket secures quick release bottle to the cage
3. Stainless steel spring loaded sipper tube prevents drips
4. Easy to grip handle
5. During warm weather ice cubes may be added to keep the water cool

**NOTE:** If the bottle leaks, wash sipper tube with dish soap and water and remove and blockage in the seal. Be sure to rinse thoroughly before filling.

If you have a young pet, place a small dish of water under the sipper until it learns to use the sipper tube regularly.
